Mercedes also does not put this information in the application. They do specify ULSD on the filler door and fuel cap, but not the dash - per Brian Fitzgerald.

The part ones do not contain the diesel labels. I checked a couple and confirmed with VW. VW did check several cars in their employee lot and confirmed with their Tennessee plant that there are labels on the dash and filler door. I also asked them to send me a page out of an owners manual talking about it.

Subject: Diesel vehicles and low sulfur fuel labels

Could you guys do a quick check on one of two applications for Mercedes, VW, and Audi to see if they mention using a label indicating the use of "low sulfur diesel fuel only" on their dashboard and fuel filler door.

Thanks,
Linc
